

Strip-it. Torque-it. Terminate-it!

In a recent Torque Test survey using a standard wrench with both aluminum and copper conductors, 75% of electricians made connections that were significantly above or below the recommended specification.

Come by Alcan Cable's Booth #901 during the 2010 Upper Midwest Electrical EXPO for free demonstrations and take the Terminate-it Torque Test to see how you measure up.

You could win a FREE torque wrench!*
