

The Shocking Truth!

Many Electricians Torque Below Specifications

In a recent Torque Test survey, 53% of trained electricians made torque connections more than 20% above and below recommended specifications. Another 22% of electricians made connections more than 20% above and below recommended specifications.

Come by Booth #611 for free demonstrations and take the Terminate-it Torque Test to see how you measure up.

You could win a FREE Torque wrench!*
